## (54) DRIVE CIRCUIT MOUNTING BOARD OF BRUSHLESS MOTOR, ITS MANUFACTURE, AND BRUSHLESS MOTOR

(57) Abstract:

PURPOSE: To achieve the life elongation of a solder connection and improve the reliability, in the drive circuit mounting board of a brushless motor used as the blast fan driving source for a household air conditioner.

CONSTITUTION: The distance between the bottom of a surface mounting component 1 and the copper part 8 of a drive circuit mounting board 2 is fixed to the height of a spacer 11 by mounting the spacer 11 on the section to mount the surface mounting component 1 of the drive circuit mounting board 2, and mounting the surface mounting component 1 thereon, and soldering it, and the solder layer becomes thick, so the life of the solder connection can be elongated.

## LEGAL STATUS

[Date of request for examination]

Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]
[Date of final disposal for application]
[Patent number]
[Date of registration]
[Number of appeal against examiner's decision of rejection]
[Date of requesting appeal against examiner's decision of rejection]
[Date of extinction of right]
